

The Success Sequence Program

Online Learning

Student Courses

All Success Sequence Program workbooks are available as online student learning courses. Students work at their own pace to watch short, engaging videos that cover the content of the workbooks, answer reflection questions, and complete chapter assessments. Teachers can access responses and run data reports to track student engagement in real time.

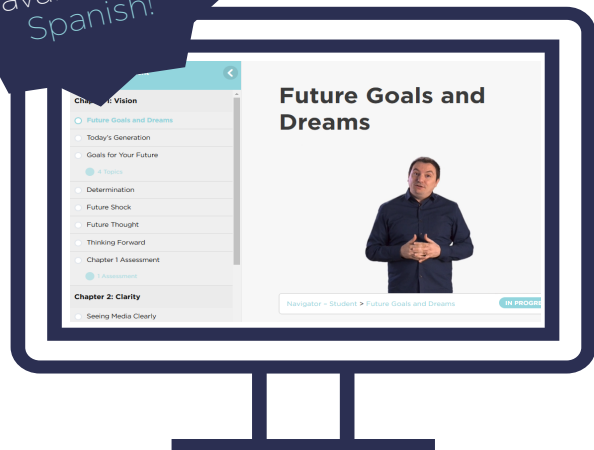

Teacher Training

All educators have access to free online trainings that walk through effective page-by-page teaching strategies for each workbook. Professional Development hours can be earned for completion of these courses in certain states, including Illinois.

In addition, our Teacher Toolbox provides a digital media library with access to over 100 supplemental videos, hands on activity demonstrations, alignment to state learning standards, and much more.

All online courses now available in Spanish!
